SUMMARY

IT Specialist and Programmer with a Computer Science degree and 4+ years of combined experience in web application development, database work and IT infrastructure support. Builds and maintains business web applications end to end, from backend logic and SQL databases to deployment, while keeping servers and networks running reliably. Uses AI-assisted development tools (Claude, Claude Code) to deliver faster and keep learning new technologies. Certified Data Analyst (BNSP) with strong troubleshooting and problem-solving skills, a sense of ownership, and experience working with cross-functional teams in Indonesia and the Netherlands.

WORK EXPERIENCE

IT Specialist – [Baker Tilly Indonesia](#)

Mar 2026 – Present

- Develop, maintain and optimize internal web applications (HRD/ERP, attendance system) and the corporate website.
- Built an internal attendance web application with photo-based check-in/out and Excel report export, using AI-assisted development.
- Manage server maintenance, LAN configuration and Mikrotik setup to keep company systems available and secure.
- Provide hardware, software and application support for staff, troubleshooting issues through to resolution.

Programmer Staff – [PT Periplus Bookindo Indonesia](#)

Mar 2019 – Sep 2022

- Developed and maintained e-commerce web applications, covering backend logic, database queries and front-end integration.
- Improved code and SQL queries for better performance, security and scalability.
- Collaborated with cross-functional teams to test, deploy and troubleshoot new features in production.
- Implemented UI/UX improvements to deliver a better customer experience.

Research & Development (SAP) – [PT Be One Solution Indonesia](#)

Oct 2018 – Feb 2019

- Built dashboards and reports on SAP Business One (ERP) data, giving clients user-friendly access to business insights.
- Worked with consultants to translate client requirements into ERP customizations and data queries.
